Key risks and our expectations continued...

In each of the following tables, we have identified the key risks we expect trustees to focus on, and features of the funding plans we expect them to develop, depending on their scheme and employer characteristics. Our feedback from trustees and advisers is that this approach has been helpful. Our guidance from earlier years on the key long-term risks remains relevant for T17 valuations and is reiterated in the tables which can be accessed via the links above. We remind trustees that these tables are not intended to be exhaustive for each category, nor are they a substitute for reading the **Annual Funding Statement** or taking independent professional advice.

Trustees should first decide how, if at all, their covenant has changed because of COVID-19 and Brexit, where broadly they are in the maturity spectrum, and how good their funding position is relative to their long-term funding target given the period over which they are aiming to achieve it. This should enable them to find the table closest to their situation, our expectations of the risks they need to focus on, and the actions we expect. They should then set about preparing their recovery plans to balance affordability with contributions linked to well-defined triggers, contingency plans and other protections for member security, as outlined earlier in this guidance.

Glossary

ABCs = Asset-backed contributions

LTFT = Long-term funding target

DRCs = Deficit repair contributions

RP = Recovery plan

IRM = Integrated risk management

TPs = Technical Provisions

Key risks and expectations for Group A1 as stated in the table on [page 3](#)

Group	A1
Characteristics	<ul style="list-style-type: none"> • Strong or tending to strong covenant. • Scheme’s funding position is considered to be strong, TPs are strong and recovery plan is shorter than around six years. • Scheme is relatively immature.
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme’s LTFT.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Where there is a high level of covenant leakage, consider proportionately increased DRCs and shorter recovery plans. • Proportionate covenant monitoring. • Clear IRM strategy, with realistic contingency planning for key downside risks.
Investment	<ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme’s LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan.
Funding	<ul style="list-style-type: none"> • Agree your ultimate goal for the scheme and set a consistent LTFT. • Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale. • Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT. • If concerned about risk of trapped surplus, consider using escrow, ABCs¹, and contingency planning.

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

¹ An asset-backed contribution arrangement (‘ABC’) is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group A2 as stated in the table on [page 3](#)

Group	A2
Characteristics	<ul style="list-style-type: none"> • Strong or tending to strong covenant. • Scheme’s funding position is considered to be strong, TPs are strong and recovery plan is shorter than around six years. • Scheme is relatively mature.
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme’s LTFT. • Increased risk to employer from greater sensitivity to investment volatility and shorter timescales for correction.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Where there is a high level of covenant leakage, consider proportionately increased DRCs and shorter recovery plans. • Proportionate covenant monitoring. • Clear IRM strategy, with realistic contingency planning for key downside risks. • Focus on the resilience of the employer to withstand downside risks over a shorter time horizon.
Investment	<ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme’s LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan. • Investment and funding plans to be structured to recognise the shorter time horizon, as well as the interplay between volatility in asset prices, investment returns and benefit outflows. • Consider your forward-looking liquidity requirements in the light of expected transfer value activity, cash commutation and benefit payments.

Group A2 What we expect from trustees and employers continued...

Funding	<ul style="list-style-type: none">• Agree your ultimate goal for the scheme and set a consistent LTFT.• Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale.• Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT.• If concerned about risk of trapped surplus, consider using escrow, ABCs², and contingency planning.• Schemes in surplus or close to surplus on the TP basis should test adequacy of TPs against assets needed to satisfy your LTFT.• Extending recovery plan end dates to make good any negative investment returns is unlikely to be acceptable, given the strength of the employer.
----------------	---

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

2 An asset-backed contribution arrangement ('ABC') is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group B1 as stated in the table on [page 3](#)

Group	B1
Characteristics	<ul style="list-style-type: none"> • Strong or tending to strong covenant. • Scheme's TPs are weak and/or recovery plans are longer than around six years. • Scheme is relatively immature.
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme's LTFT. • Focus on reducing scheme risk by strengthening TPs and recovery plans in the knowledge that the employer has the ability to provide a better overall funding agreement.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Proportionate covenant monitoring. • Where there is a high level of covenant leakage, proportionately increased DRCs and/or shorter recovery plans should be the norm. • In addition to enhancements to the recovery plan, strengthen short-term security through other means such as contingent assets and guarantees where available.
Investment	<ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme's LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan. • A focus on trustees to understand, quantify and justify the reliance on investment returns versus DRCs to repair a worse than anticipated deficit.

Group B1 What we expect from trustees and employers continued...

Funding	<ul style="list-style-type: none">• Strengthen TPs, increase DRCs and reduce recovery plan lengths.• Agree your ultimate goal for the scheme and set a consistent LTFT.• Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale.• Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT.• If concerned about risk of trapped surplus, consider using escrow, ABCs³, and contingency planning.• Extending recovery plan end dates to make good any negative investment returns is unlikely to be acceptable, given the strength of the employer.
----------------	--

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

³ An asset-backed contribution arrangement ('ABC') is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group B2 as stated in the table on [page 3](#)

Group	B2
Characteristics	<ul style="list-style-type: none"> • Strong or tending to strong covenant. • Scheme's TPs are weak and/or recovery plans are longer than around six years. • Scheme is relatively mature
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme's LTFT. • Focus on reducing scheme risk by strengthening TPs and recovery plans in the knowledge that the employer has the ability to provide a better overall funding agreement. • Increased risk to employer from greater sensitivity to investment volatility, and shorter timescales for correction.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Proportionate covenant monitoring. • Where there is a high level of covenant leakage, proportionately increased DRCs and/or shorter recovery plans should be the norm. • In addition to enhancements to the recovery plan, strengthen short-term security through other means such as contingent assets and guarantees where available. • The priority is to ensure the scheme is receiving sufficient cash contributions to meet its needs and is being treated fairly, plus a greater imperative to bolster security through contingent assets and contingency plans.

Group B2 What we expect from trustees and employers continued...

Investment	<ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme's LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan. • Investment and funding plans to be structured to recognise the shorter time horizon, as well as the interplay between volatility in asset prices, investment returns and benefit outflows. • Consider your forward-looking liquidity requirements in the light of expected transfer value activity, cash commutation and benefit payments. • The priority is to protect the scheme and employer from further downside while improving funding position by further cash and/or contingent assets.
Funding	<ul style="list-style-type: none"> • Strengthen TPs, increase DRCs and reduce recovery plan lengths. • Agree your ultimate goal for the scheme and set a consistent LTFT. • Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale. • Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT. • If concerned about risk of trapped surplus, consider using escrow, ABCs⁴, and contingency planning. • Extending recovery plan end dates to make good any negative investment returns is unlikely to be acceptable, given the strength of the employer. • A stronger focus on improving TPs and recovery plans to align with the scheme's LTFT.

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

4 An asset-backed contribution arrangement ('ABC') is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group C1 as stated in the table on [page 3](#)

Group	C1
Characteristics	<ul style="list-style-type: none"> • Weaker employer with limited affordability. • Scheme funding on track to meet LTFT, TPs are strong, and contributions are reducing deficits at a slower but affordable pace. • Scheme is relatively immature.
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Weaker covenant, may be more susceptible to adverse future events. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme's LTFT. • Risk of the employer being unable to pay increased contributions if a downside investment event occurs, or in the event of sustained adverse investment experience.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Maximise DRCs without risking sustainable growth plans of the employer. • Ensure fair treatment of scheme over all sources of covenant leakage. • Consider non-cash funding options, eg ABCs, or guarantees to strengthen security. • Proportionate covenant monitoring, with documented evidence of whether trustees consider independent covenant advice is necessary. • Where employer is part of a stronger group, seek wider group support through cash and non-cash support.

Group C1 What we expect from trustees and employers continued...

<p>Investment</p>	<ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme’s LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan. • Review the extent to which investment risks are expected to be rewarded and reduce where appropriate through suitable hedging/ risk mitigation strategies and/or changes to asset allocation. • Focus on diversification to reduce downside investment risk. • Use funding level improvements to reduce the level of risk that is not supported by the covenant (set funding-based triggers/flags to monitor). • Where there is no (or inadequate) group support, consider reducing the current level of investment risk and running it for longer to slowly reduce the deficit over time. • Monitor transfer value activity and consider liquidity issues for the scheme if accompanied by a fall in market value of investments.
<p>Funding</p>	<ul style="list-style-type: none"> • Agree your ultimate goal for the scheme and set a consistent LTFT. • Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale. • Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT. • If concerned about risk of trapped surplus, consider using escrow, ABCs⁵, and contingency planning. • Recognise that the employer may have less resilience to cope with volatile contributions – stress and scenario testing will help you to understand exposures.

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

5 An asset-backed contribution arrangement (‘ABC’) is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group C2 as stated in the table on [page 3](#)

Group	C2
Characteristics	<ul style="list-style-type: none"> • Weaker employer with limited affordability. • Scheme funding on track to meet LTFT, TPs are strong, and contributions are reducing deficits at a slower but affordable pace. • A relatively mature scheme.
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Weaker covenant, may be more susceptible to adverse future events. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme's LTFT. • Risk of the employer being unable to pay increased contributions if a downside investment event occurs, or in the event of sustained adverse investment experience. • Increased risk to employer from greater sensitivity to investment volatility, and shorter timescales for correction.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Maximise DRCs without risking sustainable growth plans of the employer. • Ensure fair treatment of scheme over all sources of covenant leakage. • Consider non-cash funding options, eg ABCs, guarantees to strengthen security. • Proportionate covenant monitoring, with documented evidence of whether trustees consider independent covenant advice is necessary. • Where employer is part of a stronger group, seek wider group support through cash and non-cash support. • Acknowledge the additional constraint of a shorter time horizon.

Group C2 What we expect from trustees and employers continued...

Investment	<ul style="list-style-type: none">• Set a long-term asset allocation consistent with the scheme's LTFT.• Establish a journey plan to move towards the long-term asset allocation.• Investment and funding plans to be structured to recognise the shorter time horizon, as well as the interplay between volatility in asset prices, investment returns and benefit outflows.• Quantify the impact on funding of adverse investment performance.• Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan.• Consider your forward-looking liquidity requirements in the light of expected transfer value activity, cash commutation and benefit payments.• Review the extent to which investment risks are expected to be rewarded and reduce where appropriate through suitable hedging/ risk mitigation strategies and/or changes to asset allocation.• Focus on diversification to reduce downside investment risk.• Use funding level improvements to reduce the level of risk that is not supported by the covenant (set funding-based triggers/flags to monitor).• Ensure asset allocation provides sufficient income and liquidity to cope with expected and unexpected benefit cash flows.• Consider the volatility of the assets used to provide liquidity to avoid significant selling of assets at lower than expected prices.• If expecting high transfer value activity, take action now to protect the scheme against liquidity issues in the event of a market downturn.
-------------------	--

Group C2 What we expect from trustees and employers continued...

Funding	<ul style="list-style-type: none">• Agree your ultimate goal for the scheme and set a consistent LTFT.• Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale.• Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT.• If concerned about risk of trapped surplus, consider using escrow, ABCs⁶, and contingency planning.• Recognise that the employer may have less resilience to cope with volatile contributions – stress and scenario testing will help you to understand exposures.• Acknowledge the additional constraint of a shorter time horizon. Therefore, the LTFT and consistency with TPs is ever more important.
----------------	---

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

6 An asset-backed contribution arrangement ('ABC') is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group D1 as stated in the table on [page 3](#)

Group	D1
Characteristics	<ul style="list-style-type: none"> • Weaker employer with limited affordability. • Scheme's TPs are weak and/or recovery plans are longer than around six years. • Scheme is relatively immature.
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Weaker covenant, may be more susceptible to adverse future events. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme's LTFT. • Risk of the employer being unable to pay increased contributions if a downside investment event occurs, or in the event of sustained adverse investment experience. • More urgent need to improve funding and reduce member risk.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Maximise DRCs without risking sustainable growth plans of the employer. • Ensure fair treatment of scheme over all sources of covenant leakage. • Consider non-cash funding options, eg ABCs, guarantees to strengthen security. • Proportionate covenant monitoring, with documented evidence of whether trustees consider independent covenant advice is necessary. • Where employer is part of a stronger group, seek wider group support through cash and non-cash support. • A greater focus on securing wider group support where available. • Prioritise the scheme over all forms of covenant leakage. • Trustees should give serious consideration to obtaining independent covenant advice to assist them in maximising the support available for the scheme. If trustees decide not to do so, they should be prepared to justify why such an approach is appropriate.

<p>Investment</p>	<p>If adequate formal group support has been conferred, treat as follows:</p> <ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme’s LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan. • Trustees should understand, quantify and justify the reliance on investment returns versus DRCs to repair a worse than anticipated deficit. <p>Otherwise, if there is a reasonable likelihood of the employer continuing as a going concern, treat as follows:</p> <ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme’s LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan. • Review the extent to which investment risks are expected to be rewarded and reduce where appropriate through suitable hedging/ risk mitigation strategies and/or changes to asset allocation. • Focus on diversification to reduce downside investment risk. • Use funding level improvements to reduce the level of risk that is not supported by the covenant (set funding-based triggers/flags to monitor). • Where there is no (or inadequate) group support, consider reducing the current level of investment risk and running it for longer to slowly reduce the deficit over time. • Monitor transfer value activity and consider liquidity issues for the scheme if accompanied by a fall in market value of investments. • Where there are concerns over the financial position of the employer, ensure there is an appropriate investment structure and sufficient liquidity to reduce investment risk quickly if the covenant deteriorates further.
--------------------------	---

Group D1 What we expect from trustees and employers continued...

Funding	<p>If adequate formal group support, treat as follows:</p> <ul style="list-style-type: none">• Agree your ultimate goal for the scheme and set a consistent LTFT.• Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale.• Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT.• If concerned about risk of trapped surplus, consider using escrow, ABCs⁷, and contingency planning. Strengthen TPs, increase DRCs and reduce recovery plan lengths.• Extending recovery plan end dates to make good any negative investment returns is unlikely to be acceptable, given the strength of the employer. <p>Otherwise, treat as follows:</p> <ul style="list-style-type: none">• Seek best possible funding outcome for members in the circumstances.• Consider the appointment of a professional trustee with experience of stressed schemes.• Be prepared to show evidence of appropriate measures, including review of any generous options and discretionary benefits, cessation of future accrual, consideration of winding up, managing your conflicts, awareness of future funding risks and ability to manage them.• Monitor transfer value activity, the assumptions and consider any reductions you believe are appropriate to protect all members.
----------------	---

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

⁷ An asset-backed contribution arrangement ('ABC') is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group D2 as stated in the table on [page 3](#)

Group	D2
Characteristics	<ul style="list-style-type: none"> • Weaker employer with limited affordability. • Scheme's TPs are weak and/or recovery plans are longer than around six years. • A relatively mature scheme.
Key risks	<ul style="list-style-type: none"> • Employer exposed to market risk if scheme is not cash flow matched/hedged. • Weaker covenant, may be more susceptible to adverse future events. • Covenant weakens at the same time as investments underperform. • Lack of long-term covenant visibility and possibility of sudden material covenant deterioration. • TPs may not be aligned to the scheme's LTFT. • Risk of the employer being unable to pay increased contributions if a downside investment event occurs, or in the event of sustained adverse investment experience. • More urgent need to improve funding and reduce member risk. • Increased risk of sudden or sustained adverse investment performance.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Maximise DRCs without risking sustainable growth plans of the employer. • Ensure fair treatment of scheme over all sources of covenant leakage. • Consider non-cash funding options, eg ABCs, guarantees to strengthen security. • Proportionate covenant monitoring, with documented evidence of whether trustees consider independent covenant advice is necessary. • Where employer is part of a stronger group, seek wider group support through cash and non-cash support. • A greater focus on securing wider group support where available. • Prioritise the scheme over all forms of covenant leakage. • Trustees should give serious consideration to obtaining independent covenant advice to assist them in maximising the support available for the scheme. If trustees decide not to do so, they should be prepared to justify why such an approach is appropriate. • A focus on maximising support for the scheme and prioritising scheme liabilities over all forms of covenant leakage.

Investment	<ul style="list-style-type: none">• Focus on minimising unsupported risks <p>If adequate formal group support has been conferred, treat as follows:</p> <ul style="list-style-type: none">– Set a long-term asset allocation consistent with the scheme’s LTFT.– Establish a journey plan to move towards the long-term asset allocation.– Quantify the impact on funding of adverse investment performance.– Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan.– Trustees should understand, quantify and justify the reliance on investment returns versus DRCs to repair a worse than anticipated deficit. <p>Otherwise, if there is a reasonable likelihood of the employer continuing as a going concern, treat as follows:</p> <ul style="list-style-type: none">– Set a long-term asset allocation consistent with the scheme’s LTFT.– Establish a journey plan to move towards the long-term asset allocation.– Quantify the impact on funding of adverse investment performance.– Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan.– Review the extent to which investment risks are expected to be rewarded and reduce where appropriate through suitable hedging/ risk mitigation strategies and/or changes to asset allocation.– Focus on diversification to reduce downside investment risk.– Use funding level improvements to reduce the level of risk that is not supported by the covenant (set funding-based triggers/flags to monitor).– Where there is no (or inadequate) group support, consider reducing the current level of investment risk and running it for longer to slowly reduce the deficit over time.– Monitor transfer value activity and consider liquidity issues for the scheme if accompanied by a fall in market value of investments.– Where there are concerns over the financial position of the employer, ensure there is an appropriate investment structure and sufficient liquidity to reduce investment risk quickly if the covenant deteriorates further.

Group D2 What we expect from trustees and employers continued...

Funding	<ul style="list-style-type: none">• Focus on improving scheme funding <p>If adequate formal group support, treat as follows:</p> <ul style="list-style-type: none">– Agree your ultimate goal for the scheme and set a consistent LTFT.– Establish a plan for progressing from your current TPs to your LTFT within a realistic timescale.– Ensure TPs can be evidenced to be consistent with the journey plan to reach the LTFT.– If concerned about risk of trapped surplus, consider using escrow, ABCs⁸, and contingency planning. Strengthen TPs, increase DRCs and reduce recovery plan lengths.– Extending recovery plan end dates to make good any negative investment returns is unlikely to be acceptable, given the strength of the employer. <p>Otherwise, treat as follows:</p> <ul style="list-style-type: none">– Seek best possible funding outcome for members in the circumstances.– Consider the appointment of a professional trustee with experience of stressed schemes.– Be prepared to show evidence of appropriate measures, including review of any generous options and discretionary benefits, cessation of future accrual, consideration of winding up, managing your conflicts, awareness of future funding risks and ability to manage them.– Monitor transfer value activity, the assumptions and consider any reductions you believe are appropriate to protect all members.
----------------	---

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

⁸ An asset-backed contribution arrangement ('ABC') is a contractual arrangement between trustees and one or more entities

Key risks and expectations for Group E1 as stated in the table on [page 3](#)

Group	E1
Characteristics	<ul style="list-style-type: none"> • Weak employer unable to provide support. • Stressed scheme with limited or no ability to use flexibilities in the funding regime. • Scheme is relatively immature.
Key risks	<ul style="list-style-type: none"> • Crystallisation of unsupported investment risk and/or employer affordability weakening further.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Where trustees consider that further support is possible (from the employer or wider group), independent covenant advice can support the trustees in negotiations to improve the scheme's position. • Focus on mitigations against further covenant weakening, including cessation of dividend payments, and maximisation of non-cash support (be prepared to show the evidence). • Proportionate covenant monitoring using independent experts able to advise on areas where mitigation could be sought, and appropriate mechanisms to detect early signs of further deterioration. • If there is a high risk of employer insolvency, trustees should fully explore their options and consider which ones might be deployed to best enhance member outcomes. PPF guidance on insolvency and restructuring should help.

Group E1 What we expect from trustees and employers continued...

<p>Investment</p>	<p>Where there is a reasonable likelihood of the employer continuing as a going concern:</p> <ul style="list-style-type: none"> • Set a long-term asset allocation consistent with the scheme’s LTFT. • Establish a journey plan to move towards the long-term asset allocation. • Quantify the impact on funding of adverse investment performance. • Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan. • Review the extent to which investment risks are expected to be rewarded and reduce where appropriate through suitable hedging/ risk mitigation strategies and/or changes to asset allocation. • Focus on diversification to reduce downside investment risk. • Use funding level improvements to reduce the level of risk that is not supported by the covenant (set funding-based triggers/flags to monitor). • Where there is no (or inadequate) group support, consider reducing the current level of investment risk and running it for longer to slowly reduce the deficit over time. • Monitor transfer value activity and consider liquidity issues for the scheme if accompanied by a fall in market value of investments. <p>Where there is a reasonable likelihood of the employer not continuing as a going concern:</p> <ul style="list-style-type: none"> • Where there are concerns over the financial position of the employer, ensure there is an appropriate investment structure and sufficient liquidity to reduce investment risk quickly if the covenant deteriorates further.
<p>Funding</p>	<ul style="list-style-type: none"> • Seek best possible funding outcome for members in the circumstances. • Consider the appointment of a professional trustee with experience of stressed schemes. • Be prepared to show evidence of appropriate measures, including review of any generous options and discretionary benefits, cessation of future accrual, consideration of winding up, managing your conflicts, awareness of future funding risks and ability to manage them. • Monitor transfer value activity, the assumptions and consider any reductions you believe are appropriate to protect all members.

Please note: If you need to check another scheme, please refer back to the table on [page 3](#)

Key risks and expectations for Group E2 as stated in the table on [page 3](#)

Group	E2
Characteristics	<ul style="list-style-type: none"> • Weak employer unable to provide support. • Stressed scheme with limited or no ability to use flexibilities in the funding regime. • A relatively mature scheme.
Key risks	<ul style="list-style-type: none"> • Crystallisation of unsupported investment risk and/or employer affordability weakening further but limited time for recovery.
What we expect from trustees and employers	
Covenant	<ul style="list-style-type: none"> • Where trustees consider that further support is possible (from the employer or wider group), independent covenant advice can support the trustees in negotiations to improve the scheme's position. • Recognising the time horizon is shorter, focus on mitigations against further covenant weakening, including cessation of dividend payments, and maximisation of non-cash support (be prepared to show the evidence). • Proportionate covenant monitoring using independent experts able to advise on areas where mitigation could be sought, and appropriate mechanisms to detect early signs of further deterioration. • If there is a high risk of employer insolvency, trustees should fully explore their options and consider which ones might be deployed to best enhance member outcomes. PPF guidance on insolvency and restructuring should help.

Investment	<p>If there is a reasonable likelihood of the employer continuing as a going concern:</p> <ul style="list-style-type: none">• Set a long-term asset allocation consistent with the scheme’s LTFT.• Establish a journey plan to move towards the long-term asset allocation.• Investment and funding plans to be structured to recognise the shorter time horizon, as well as the interplay between volatility in asset prices, investment returns and benefit outflows.• Quantify the impact on funding of adverse investment performance.• Test and evidence the ability of the covenant to support downside investment risk (supportable investment risk) by means of additional cash and non-cash funding, without extending the length of the recovery plan.• Consider your forward-looking liquidity requirements in the light of expected transfer value activity, cash commutation and benefit payments.• Review the extent to which investment risks are expected to be rewarded and reduce where appropriate through suitable hedging/ risk mitigation strategies and/or changes to asset allocation.• Focus on diversification to reduce downside investment risk.• Use funding level improvements to reduce the level of risk that is not supported by the covenant (set funding-based triggers/flags to monitor).• Ensure asset allocation provides sufficient income and liquidity to cope with expected and unexpected benefit cash flows.• Consider the volatility of the assets used to provide liquidity to avoid significant selling of assets at lower than expected prices.• If expecting high transfer value activity, take action now to protect the scheme against liquidity issues in the event of a market downturn. <p>Where there are concerns over the financial position of the employer:</p> <ul style="list-style-type: none">• Ensure there is an appropriate investment structure and sufficient liquidity to reduce investment risk quickly if the covenant deteriorates further.
-------------------	--

Group E2 What we expect from trustees and employers continued...

Funding	<ul style="list-style-type: none">• Recognising that the time horizon is shorter, seek best possible funding outcome for members in the circumstances.• Consider the appointment of a professional trustee with experience of stressed schemes.• Be prepared to show evidence of appropriate measures, including review of any generous options and discretionary benefits, cessation of future accrual, consideration of winding up, managing your conflicts, awareness of future funding risks and ability to manage them.• Monitor transfer value activity, the assumptions and consider any reductions you believe are appropriate to protect all members.• Be prepared to evidence good reasons for not reducing transfer values for underfunding.
